## **CHILD PROTECTION POLICY**

We respect children's rights and adopt appropriate safeguards for the protection of children against all forms of exploitation.

We support measures that prevent children from falling into need of protection and care.

We provide support to the institutions and organisations that will ensure that the children involved in crime or against whom crimes have been committed are reintegrated into the community.

We collaborate with all stakeholders providing services to children.

We engage in activities that increase social awareness and sensitivity towards the prevention of violence against children.

We conduct training courses on child protection organised for our staff.

We contribute to all kinds of organisations and activities for child protection in our community.

In the event of a possible abuse, we train our staff on removing the child from the abuse environment and informing the department manager.
